INSTRUCTIONS TO APPLICANT FOR RESIDENTIAL BUILDING PERMIT APPLICATION

NOTE: PLANNING AND ZONING REVIEW MUST BE COMPLETED PRIOR TO SUBMISSION OF BUILDING PERMIT

ONE SET OF SITE PLANS MUST BE SUBMITTED IN CONJUNCTION WITH THE BUILDING PERMIT APPLICATION.

THE APPLICATION, ALONG WITH THE INFORMATION REQUIRED , WILL BE ACCEPTED BY THE BUILDING OFFICIAL'S OFFICE FOR HIS REVIEW. APPLICATIONS WILL BE DATED AT THE TIME OF RECEIPT. AFTER INITIAL EXAMINATION BY THE BUILDING OFFICIAL, THE APPLICATION MATERIAL WILL BE PASSED TO OTHER STAFF MEMBERS FOR CONSIDERATION AND REVIEW. EACH DEPARTMENT SHALL PERFORM ITS REVIEW IN A THOROUGH, BUT TIMELY MANNER.

THE APPLICATION PROCESS IS NOT COMPLETE UNTIL EACH AND EVERY DEPARTMENT HAS GIVEN ITS APPROVAL. APPROVAL REQUIRES A DATE AND AN AUTHORIZED SIGNATURE. IN THE CASE OF DENIAL, AN ADDITIONAL COMMENT SHEET WILL BE ATTACHED TO INFORM THE APPLICANT OF THE CAUSE. AN INCOMPLETE APPLICATION IS NOT CAUSE FOR DENIAL BUT WILL REQUIRE FURTHER REVIEW FOLLOWING RECEIPT OF MORE INFORMATION.

WHEN THE PLAN REVIEW IS COMPLETE, ALL INFORMATION PERTAINING TO THE APPLICATION WILL BE RETURNED TO THE COMMUNITY DEVELOPMENT SECRETARY . THE SECRETARY WILL NOTIFY THE APPLICANT, WHO WILL BE ASKED TO PAY THE CALCULATED PERMIT FEE. A RECEIPT FOR THE BUILDING PERMIT COST AND A COPY OF THE BUILDING PERMIT APPLICATION WILL SERVE AS PROOF OF VALIDATED PERMIT AND MUST BE ISSUED BEFORE THE CONSTRUCTION PROJECT CAN BEGIN.

CONSTRUCTION BEST MANAGEMENT PRACTICES (BMPs)

Supplement to the City of OKmulgee Building Permit Application

Protect Natural Features

- * Minimize Clearing
- * Identify and protect existing vegetation that will not be disturbed
- * Minimize amount of exposed soil
- * Protect streams, stream buffers, woodlands or other sensitive areas from disturbance or construction activity

Construction Phasing

- * Sequence construction activities so that the soil is no exposed for long periods of time
- * Schedule or limit grading to small areas
- * Schedule site stabilizing activities to be completed immediately after the land has been graded to final contour
- * Install key sediment control practices before site grading

Vegetative Buffers

- * Protect and install vegetative buffers along waterbodies to slow and filter stormwater runoff
- * Maintain buffers by mowing or replanting periodically to ensure effectiveness

Site Stabilization

- * Vegetate, mulch or otherwise stabilize all exposed areas as soon as land alteration has been completed
- * Break up long slopes with sediment barriers or divert stormwater away from slopes

Why are stormwater discharges from construction activities matter?

When it rains, stormwater washes over the loose soil on a construction site, along with materials and products being stored outside. As stormwater flows over the site, it can pick up pollutants like sediment, debris and chemicals from the soil and transport them to nearby storm systems or directly into rivers, lakes and streams.

Sediment in waterbodies from construction sites can reduce the amount of sunlight reaching plants, clog fish gills, smother habitat and spawning areas, and high volumes of runoff can cause stream bank erosion. Controlling erosion and sediment can significantly reduce the amount of sedimentation and other pollutants transported by stormwater runoff from construction sites.

The Oklahoma Pollution Discharge Elimination System (OPDES) stormwater program, authorized by the NPDES stormwater permitting program, requires construction site owners/operators to obtain coverage under the OPDES Construction General Permit OKR10 to discharge stormwater from their construction sites and implement appropriate pollution prevention controls/techniques to minimize pollutants and reduce stormwater runoff.

A permit is required before construction activity can start at a site. As part of the application the owner and/or operator must develop and implement a Stormwater Pollution Prevention Plan (SWP3).

Who needs an OPDES Permit?

- * You are disturbing one acre or more land area
- * Less than one acre of land if that activity is part of a "larger common plan of development or sale" that is greater than one acre

Erosion & Sediment Control Basics

- * Install BMPs to control erosion and sediment and manage stormwater
- * Use proper BMPs to divert stormwater away from disturbed or exposed areas and slow down stormwater as it travels across project sites
- * Inspect site regularly and properly maintain BMPs
- * Inspect and maintain silt fences, make sure stormwater is not flowing around the silt fences
- * Keep construction site clean and free of litter, construction debris and leaking containers, and keep storage containers covered
- * Cover and seed dirt stockpiles
- * Revise stormwater plan during construction as site conditions change if BMPs are not effective at controlling erosion and sediment
- * Maintain construction site exits so as not to transfer mud and dirt to roadways
- * Protect storm drain inlets with appropriate BMPs such as fiber rolls, gravel bags, berms, sediment basins, etc.

Regular inspections

Maintain you BMPs

Keep site clean

Revise plan for changing conditions

GIVE 24 HOURS NOTICE FOR INSPECTIONS
 PLANS MUST BE ON JOB BEFORE INSPECTIONS WILL BE MADE
 AT LEAST (1) INSPECTION EVERY 90 DAYS OR PERMIT EXPIRES

INSPECTIONS PERFORMED FOR 9:00A.M. - 4:00P.M.
 CALL (918) 758-1105 FOR INSPECTIONS.
 YOU MUST PROVIDE THE PERMIT NUMBER.

P.O. Box 250
